## **Oregon, please give it up for your cannabis growers.**

No matter if you enjoy consuming cannabis via bong, pipe, vape, apple or joint, if you eat it, apply it topically, enjoy an extracted concentrate, if you produce any of those products, or own a dispensary where you sell them, the truth remains that without cannabis growers, you wouldn't have any of those options.

Oregon has a long standing, well deserved reputation of producing some of the finest cannabis in the world. Not just the U.S., the entire planet. It started back in the 1960s, and continues to this day. And with the roll out of legalized adult use sales this year, we are proving this to people from all around the globe who travel here to partake and enjoy the Pacific Wonderland that we call home.

Part of Oregon's Cannabis Concierge's mission statement is to help promote and brand the cannabis producers from around Oregon, both indoor and outdoor, while educating the public about the variety and effects of the hundreds of strains produced. The goal that lead to this guide and "Green Friday" was to create an event showcasing the sun grown crops from Southern Oregon.

We hope that you will enjoy your \$20 quarter ounce, and read about all the farms involved. We don't believe in the indoor vs. outdoor arguments, we believe in high quality, clean flower, no matter where it puts down its roots.

Finally, we want to thank our partners - The CO2 Company, Slipstream Distribution, OG Analytical, Oregon Leaf, DailyLeafDeals.com, and The Portland Mercury (where you can read my rantings every week in "Cannabuzz: The Week in Cannabis News".)

Support your local dispensary. Recreate/medicate responsibly. And please take a moment to thank a Cannabis farmer. That glass jar you are holding is filled with the beautiful fruits of their hard labor.

Happy Holidays,

Joshua Jardine Infante

Founder/CEO Oregon's Cannabis Concierge

## PARTICIPATING FARMS

**APPLEGATE JANE**  
[www.applegatejane.com](http://www.applegatejane.com)

Applegate Jane is clean, conscious cannabis grown outdoors under the sun, the moon and the stars on Moon Mountain in the Applegate Watershed of Southern Oregon. Using stringent organic methods, clean well water and lots of prayer this medicine is intended to bless you with well-being and happiness. We focus on honouring the plant spirit medicine in order to bring its highest healing qualities to you knowing that, like you, she is more than a number. We offer our flower in bulk, packaged in food grade stainless steel cans with nitrogen for sustained freshness and in extracts and concentrates.

*Strains: Harlequin OG, Blue Shoe Sour Diesel*

### F. F. F. SOUTHERN OREGON

We grow only organically with extra love, compassion, and respect. We build our own soil year after year to provide you flowers that are clean and free of contaminants. Tested and Passed! (Flying Colors!) Every flower is handled with care, all the way from our farm to you. Enjoy the benefits of our many years of experience. Feel the love from a cut above. WITH BONSAI PRECISION! YOU MAKE US VERY HAPPY! WE MAKE YOU VERY HAPPY!

**GENESIS PHARMS**  
[www.genesispharms.com](http://www.genesispharms.com)

Genesis Pharms is a group of compassionate people who believe in the power of cannabis to help and to heal. Genesis Pharms has indoor and outdoor gardens where they grow the medicinal plants. They specialize in making full plant cannabis extract Rick Simpson Oil, affectionately referred to as RSO as well as a variety of cannabis infused products.

## GREEN FRIDAY 2015

## PARTICIPATING FARMS

### MEDI SUN FARMS

[medisunfarms.com](http://medisunfarms.com)

[facebook.com/medisunfarms](https://facebook.com/medisunfarms)

[instagram.com/medisun\\_farms](https://instagram.com/medisun_farms)

MediSun Farms is "Sunstainably Grown Cannabis". Our plants are sun grown in Southern Oregon using sustainable practices with a focus on biologicals and companion plants. We cultivate a variety of genetics from

indicas to sativas, with cbd dominance to THC dominance. We are working with several concentrate companies to bring variety to the shelf. In addition to our 5 farms we have contract farmers who support as well. We love cannabis culture and look forward to the emerging possibilities to come out of the shadows and into the light!!

### MINDFUL EARTH

Mindful Earth Farms is a growing collective of sun-grown cannabis farms united thru the implementation of biologic/regenerative farming methods. Born within the heart of the Jackson County GMO-Free movement and Southern Oregon Seed Savers Association, Mindful Earth fuses seed-grown cannabis cultivation with poly-culture food forest horticulture and GMO-Free heirloom seed preservation. Our goal is to unite socially conscious investors with organic family farmers to reclaim food-as-medicine sovereignty in Southern Oregon. Mindful Earth Medicinals cannabis products benefit from our adherence to strict organic cultivation and pest management standards, enhanced by on-site animal husbandry & soil alchemy practices. In addition to our crystalline raw flower products, Mindful Earth Medicinals is weaving traditional Chinese, Ayurvedic and Western herbal preparations with specific cannabis strains that inspire deeper breath, intuition, and wisdom into focused healing and life-enhancing formulas. Enjoy!

*Strains: Violet Avatar, Jonny's Tonic, Ambrosia Haze, ACDC*

# OREGON'S CANNABIS CONCIERGE

We are Oregon's Cannabis Concierge, a new full service agency for all your cannabis needs.

We brought you Weed The People as our inaugural project; supporting the work of our State's Cannabis Growers is just one of the things we do.

- ✿ We brand, promote and design marketing and promotion strategies for farmers. From logos to legal packages, we take care of the details so you can grow.
- ✿ We offer Cannabis 101 classes to get you up to speed about the myriad products, equipment, terminology, and laws.
- ✿ We provide high end canna-tourism packages, including customized itineraries, cannabis farm tours, and classes on making edibles and solvent-free concentrates.
- ✿ We integrate cannabis into your professional and personal life: include it in your company function, wedding, birthday party or other gathering.

We believe in responsible, adult use of this amazing plant. Prohibition has ended. Get in touch, we're here to help.

[www.oregonscannabisconcierge.com](http://www.oregonscannabisconcierge.com)

## PARTICIPATING FARMS

### SO.O FARM

In 1975 we relocated from Denver to Southern Oregon; 1977 we found "our farm" - 26 acres. We cleared, cleaned and began planting directly in the rich red volcanic soil. Over the years we have amended the soil with our own animals manure; goat, chicken, emu, sheep, rabbit. Our gardens are rich in mycorrhizae, worms and love because we have only used organic products; many of which we produce. We began

growing only female plants in 1978, and produced many of our own strains. The family works continually to improve our over 40 quality strains. Our children are now second generation farmers. Together we want to grow and improve our business. We have always been told that our products are the best of the best, and by us using only natural growing methods we feel secure that those comments will continue.

*Strains: Skywalker OG, Deadhead OG, Granddaddy Purple, Critical Hog*

### SOUR "G" FARMS

[sourgfarms.com](http://sourgfarms.com)

Sour "G" Farms is located in the heart of the Applegate Valley, allowing 365 days of Greenhouse growing. We specialize in Greenhouse cultivation (long season), 4

season Greenhouse deprivation, and indoor cultivation for starts. We are dedicated to a 100% organic gardening approach w/ a full IPM system in place to ensure a holistic and 100% organic product is produced. We exclusively use Plan "B" Organics®, Be Friendly™ soils, fertilizers, and amendments. These products comply with NOP, OMRI, and CDFA O.G. We share a combined 42 years of experience cultivating flowers, and production of medical cannabis concentrates and edibles. This helps to ensure high quality 100% organic cannabis, properly cured and hand trimmed, testing at 18-26% THC, and fully flushed to ensure maximum terpene and cannabinoid production. Our feature strains include NYC Sour Diesel, Banana Kush, OG Kush and Dogshit, aka "The True Columbian Gold", with many exclusive cuttings from seed.

*Strains: NYC Sour Diesel, Banana Kush, OG Kush, Dogshit aka "The True Columbian Gold"*

## GREEN FRIDAY 2015

## PARTICIPATING FARMS

### SUNSHINE MEDICINALS

[truesunshinemedicinals.com](http://truesunshinemedicinals.com)

Sunshine Medicinals is located in Williams, the heart of sunny Southern Oregon. Our farm is the result of 20 years combined experience in the fine art of cannabis cultivation. We create quality medicine for the people and are active members of our community and industry. Our passion for the cannabis plant is evident in our product line, and our farming style. Our plants are encouraged to thrive in only the finest of nutrients and soil. Regular applications of compost tea, predatory insects, and non-crystalline organic silicon greatly mitigate the need for pesticides and fungicides, which we feel is paramount for the safety of the patients. Extra attention is paid to the drying curing and storing to insure the finest quality medical grade cannabis.

### SOUTHERN OREGON SENSI

Nestled deep in the sun kissed hills of Josephine County sits the SOS farm. Southern Oregon Sensi is a collective of like minded enthusiasts with a focal point on environmental stewardship. We strive to provide the highest quality organic cannabis with the lowest environmental impact. This includes sourcing water, soil, nutrients and other inputs from local, sustainable sources.

As a consumer, the embodied energy used to bring a product to market is an important element when narrowing down ones selection. Bottled water for example has its place in the

market, though many consumers are turned away when weighing in the extra energy, fuel, and material to get it in the hands of the consumer. We believe that marijuana should be viewed similarly. Our raised garden beds are located on a Southern facing slope and enjoy full sun from dawn 'til dusk. Our PH balanced water is supplied by an on site creek full of natural beneficial microbes. We solely use Oregon sourced organic fertilizers and refrain from pesticides.

This year, we hand selected three strains all unique in appearance and perceived effect. Purple Hindu Kush is a highly sought after Southern Oregon bred strain that offers a sedative effect and excellent flavor. The aroma of the frosty purple buds is easily identifiable and enjoyed. Our Sapphire is a sativa dominant hybrid. This fruity smelling strain is known for its ability to treat anxiety and stress. Lastly, we offer an excellent phenotype of Blue City Diesel. Prominent, beautiful pink and purple hairs extend late into the flowering stage and its scent appeals to the masses. All three of our strains are properly cured, hand trimmed with love and test right around 20% THC. We invite you to enjoy our flavorful and effective Southern Oregon Sensi.

## GREEN FRIDAY 2015

Located in the heart of the Siskiyou Mountains, **Medicinal Roots™** takes pride in progressive leadership by providing a model of sustainability, education & transparency.

Our growing practices ensure meticulous attention to phenotype & terpene profiles for flavorful & potent genetics that have been perfected since 2006.

*Some of our flagship strains include:*

**NICE CHERRY**

A flavorful, high THC, Indica dominant strain with a spicy aroma.

**CHERRY SKUNK**

A high THC, Sativa dominant flower with a cherry aroma.

**SKUNK DOG**

A crystal condensed, high THC, Sativa dominant, richly flavored flower.

**POPPA CHERRY**

A sweet, robust Indica-dominant flower.

**Medicinal Roots LLC™**

**GROWFORWARD™**

*Ask for our strains in your local dispensary!*

Our educated team of people from seed to science is here to serve you and the community with our finest and best-crafted cannabis oils.

[www.theco2company.com](http://www.theco2company.com)

## PARTICIPATING FARMS

### SWEDEN FARM

Hello! I'm Cindy, but my Sweden Farm name is MamaLou. I'm the Head Grower for The CO2 Company's CBD Farm, located in the beautiful Applegate Valley. My two sons, Kevin and

Ryan, relocated me here from the East coast, where I spent 10 years as owner of my own gardening business. I love Oregon and our contributions to the cannabis world! I moved here after a breast cancer scare, which I am happy to say was benign. But I'm all the more grateful to be able to work with CBD plants. For me, it's about the medicine and being able to help others relieve their suffering, ease their pain, and support their healing.

Our CBD plants are grown in a full sun garden. We ONLY use organic products, and never any pesticides, ever. Plants need full sun, organic soil, and properly pH water to transport nutrients necessary for healthy growth and, of course, lots of love. My future goal is to make CBD products to be sold in dispensaries as well as to continue to grow, learn and enjoy this awesome adventure.

*Strains: Harlequin OG, Blue Shoe Sour Diesel*

### TOKIE FARMS

[sourcfarms.com](http://sourcfarms.com)

Tokie Farms is a female owned and operated cannabis farm in Southern Oregon. The main focus of Tokie Farms is sustainability. I went to school for environmental studies at the University of Montana in Missoula, Montana and am extremely passionate about being an environmental leader in the evolving industry. We, as

farmers, activists, business owners and consumers, are shaping and developing the rules, regulations and standards for this industry. Being on the forefront of this industry it is our obligation to begin setting industry standards that far surpass that of traditional agriculture. We are in a position of power, to speak for the trees, I designed my farm with their message in mind. The main objective of Tokie Farms is to grow beyond organic, eco-friendly cannabis. My goal in running and operating this farm is to be constantly evolving in a way that reduces my carbon footprint and increases my knowledge of permacultural practices. Tokie Farms is currently clean green certified, there are no grow lights used in any phase on this farm, all products used on the farm are 100% organic and sourced as locally as possible. Tokie Farms is a biodynamic living soil farm, all nutrients given to the plants are done in their raw form with a large emphasis on fermentation and compost tea brewing. I believe firmly in probiotic methods of pest and fungal management. Beneficial bugs and bacterias are the backbone of this farm. We need to be the change we wish to see in this world, Tokiefarms is a manifestation of that dream for me.

## GREEN FRIDAY 2015

## PARTICIPATING FARMS

### PEACOCK NATION

The Story of the Peacock Nation - Twenty years ago, a humble peacock received a great vision from spirit. It involved relocation to a sacred and spiritual land, attunement to the ever expanding universe and the creation of a space to produce medicinal cannabis of the highest vibrations! So here we are today! Living in the southern Oregon mountains, gardening in the great outdoors and fanning our colorful feathers at the moon and stars! Hyper-Organic and Biodynamic principles guide our gardening practices thru each and every growing cycle. Care and attention is taken thru each step in ensuring the medicine stays true to its highest form. The universe is constantly consulted in advising us what specific genetic strains might be of present and future use for the peoples. Natural Garden Alchemy involves the study and utilization of the native elements, Earth Fire Metal Water Air and Ether to achieve optimum balance in the garden space. This is reflected in the quality and the vibration of the medicine produced. For the humble peacock with the grand vision, the native elements used are reflected in the colors of his dress, Green Brown Black of the earth, Gold Blue and Violet of the ethereal sky! This is the peacock's approach in the Garden of Bhakti!

---

### BURNWELL AND FAMILY

Burnwell and Family is a premier Southern Oregon Indoor medicinal cannabis farm specializing in a wide array of top shelf strains grown in the best soil and with the highest quality nutrients. We are OMMP compliant and are here to provide the best medicine possible to our surrounding community. We pride ourselves in terpene production and in having a large variety of strains. We look forward to sharing the love we have to offer with all the patients in the Oregon family!

---

### COUNCIL CREEK CHRONIC FARM

Council Creek Chronic Farm is a small family farm located in sunny Southern Oregon, where we raise chickens, pigs, turkeys and of course Cannabis. We have over 45 years combined farming experience, and everything is grown organically with manures and composts generated on the farm, along with locally sourced OMRI approved organics. Our plants are given pure, fresh mountain spring water, resulting in smooth, effective lab tested quality medicine.

GREEN FRIDAY 2015

## PARTICIPATING FARMS

### EBB & FLOW

Ebb & Flow is a women owned and operated medical cannabis farm located in the mountainous Cascade region east of Ashland, Oregon. We are an off-grid operation relying on the sun for energy and gravity fed pristine spring water. Planted in biologically rich soil and using true organic methods, we lovingly nurture our ladies throughout their entire lifecycle. The end result shines through in potency, flavor and overall experience.

We are very passionate about the purity of our product and believe this sets us apart from the average grower. We are constantly seeking out unique, highly medicinal, aromatic, and potent varieties of cannabis and aspire to create our own signature strains in the future.

*Strains: Fire OG, Quantum Kush, Whitewater Kush, Tahoe Cheese*

### VISIONARYMEANS

[VisionaryMeans.com](http://VisionaryMeans.com)

"The Spirit of the Plant" - We believe Cannabis, used respectfully, is a means to visionary experience: altered states that bring the brain's frame of perception into focus and brings stressed bodies back to healing. As medical practitioners we know Cannabis, an ancient herb, in formulation with other herbs, treats many illnesses. Whether you use

herbs for wisdom or herbs for health, here in southern Oregon at the RockingEweRanch, we grow the best varietals pesticide-free by rigorous application of safe OMRI preventatives. Committed to environmentally sound Permaculture inspired agricultural methods, you get great chemical-free Cannabis. Plants grow in sundrenched organic living soil nurtured by a dedicated team of young farmers and knowledgeable grey-beards. We cycle plant nutrients on-site from pastured chickens and grass-fed sheep to regeneratively feed the living soil web, until populated with dynamic mycorrhizal organisms that efficiently ferry nutrients into roots. Amendments sourced locally whenever possible. This produces great bud taste, nose and perfectly matured crystalline trichombs.
